Operatie tegen overgewicht

Team en Visie

COE - Centre Of Excellence

Aan het Slotervaartziekenhuis werd op 25 april 2013 de status van Centre Of Excellence toegekend door de European Accreditation Council for Healthcare Professions (EACHP). Dit betekent dat de Slotervaartziekenhuis de hoogst mogelijke kwaliteit van zorg garandeert voor de behandeling van overgewicht met een Gastric By Pass operatie.

De heer A. van de Laar, Dr. B. van de Boven en Dr. Y. Acherman zijn gespecialiseerd in de behandeling tegen overgewicht, ook met behulp van de nieuwste chirurgische technieken. Dit team bestaat uit een multidisciplinair team van chirurgen, diëtisten, psychologen en verpleegkundigen.

"Deerna beleid"

De behandelingen worden uitgevoerd in de operatie halven en worden aan het beste overgewicht van een meegewerkend team in Europa. Daarbij worden de meest moderne methoden toegepast om de kwaliteit van de zorg te verbeteren.

Who is in charge apart IFSO in Serbia?

Bariatric and Metabolic Surgery in Serbia

Conclusion

Bariatric and Metabolic surgery exist ten years in Serbia (and Montenegro).

There is no large number of operations, because government does not support metabolic operations (financial reason?).

Two largest cities in Serbia (Belgrade and Novi Sad) are centers of tertiary surgery as well as metabolic surgery, especially in hands of esophageal surgeons.

In three CME courses organized in Novi Sad (Sr. Kamenica) there was limited interest of surgeons for education in Bariatric and Metabolic surgery.

IFSO chapter in Serbia does not exist in real life.

We need organized support from Bariatric and Metabolic Surgery community.
